G.PAVANI(R170879)

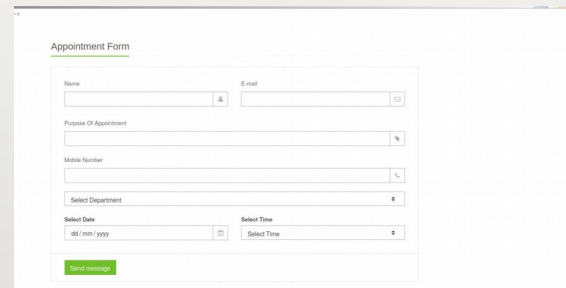

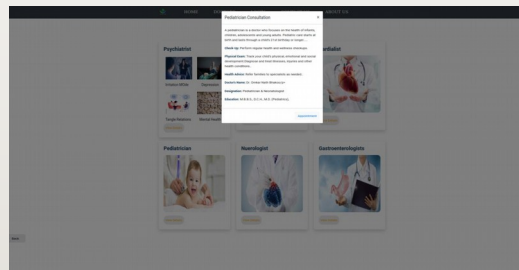

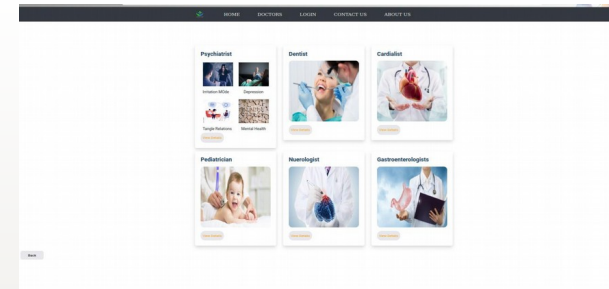

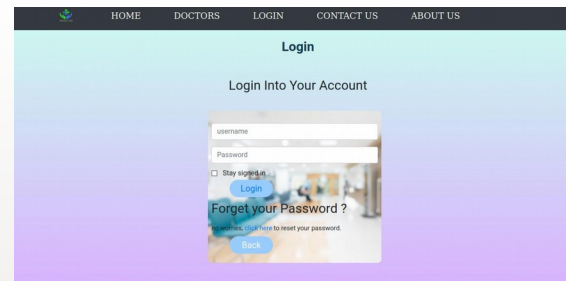

INTRODUCTION

- The MedWin Hospital System is designed to replace their existing manual, paper-based system. This system targets to provide a complete solution for hospitals and health care services.
- Login Module is used to login into patients and Hospital Members as well.
- The contact us page gives the details of the hospital to contact online.
- The overall project of ours is being developed to help the people to know in detail about the hospital services openly. And book the appointment to relevant diseases...

OVERVIEW OF PROJECT

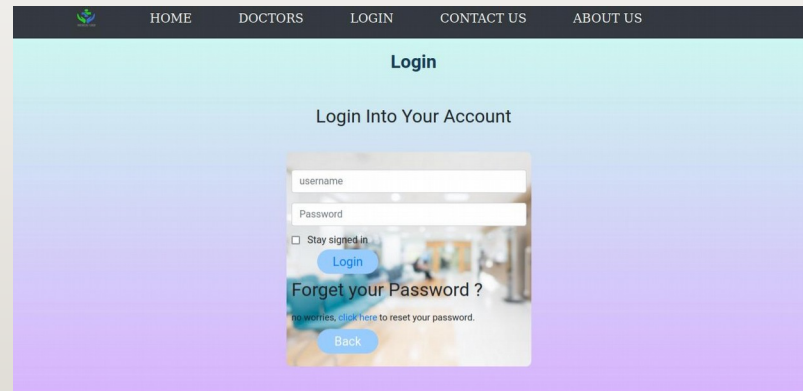

1.HOME PAGE

- The main Home Page is a MedWin hospital home page which contains an entry button as explore button, when we want to know or book an appointment or know about the hospital features we click on the explore button...This page is also having a footer section which contains the location of the hospital and social media logos etc.

LOGIN PAGE

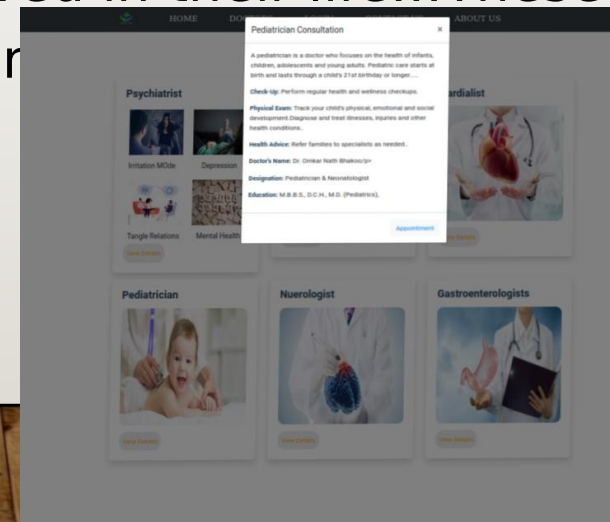

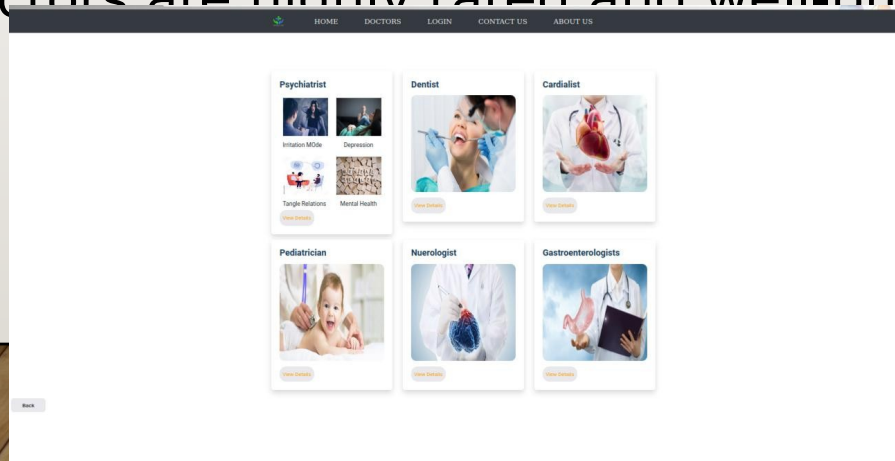

- Login page when people wants to explore the details or know about the types of doctors present in the hospital and for the booking purpose they all must be logged in. Data entered must be accurate and detailed...main entry for exploring the website.

The screenshot displays a web application's login interface. At the top, a dark navigation bar contains links for HOME, DOCTORS, LOGIN, CONTACT US, and ABOUT US. The main content area has a light blue gradient background. The title 'Login' is centered at the top of the form area, followed by the subtitle 'Login Into Your Account'. The login form itself is a white card with a light blue border. It includes a 'username' input field, a 'Password' input field, and a checkbox labeled 'Stay signed in'. Below these fields is a blue 'Login' button. Underneath the button is a link for 'Forget your Password ?' with the text 'no worries, click here to reset your password.' and a blue 'Back' button. The entire page is set against a background of a wooden floor.

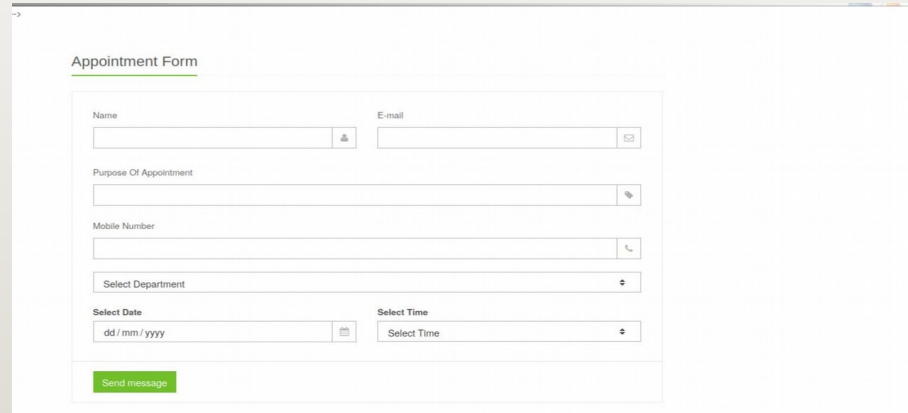

DOCTORS LIST

- This page is a doctor's list page which contains different types of doctors present in the hospital, this page is designed with detailed information and the images tell what kind of doctor that particular container contains...in the doctor's list page single specialist has a brief description about the treatment they cured and that particular specialist doctor achievements they achieved in their life...These all doctors are highly rated and well-profession

APPOINTMENT FORM

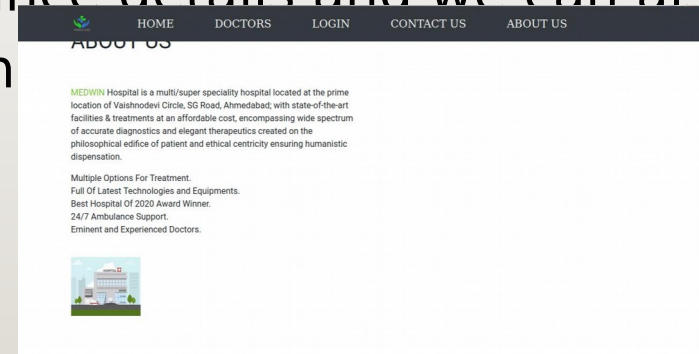

- This page is useful when the people or patients feel satisfied with the doctor's treatment after knowing about their specialist Then they click on the appointment button then appointment form will be opened and then they can easily book the appointment to consult with the doctor by entering needed data and it will be saved...

The screenshot shows a web browser window displaying an "Appointment Form". The form is titled "Appointment Form" and contains several input fields and a submit button. The fields are: "Name" (text input), "E-mail" (text input), "Purpose Of Appointment" (text input), "Mobile Number" (text input), "Select Department" (dropdown menu), "Select Date" (calendar icon), and "Select Time" (dropdown menu). A green "Send message" button is located at the bottom of the form.

ABOUT US & CONTACT US

- AboutUs page gives information about the hospital and doctors in the hospital and facilities provided by the hospital...and treatments like surgeries and so on...
- Contact Us page contains all the interaction information with the hospital for knowing about the hospital by making a call to the hospital number and for ambulance details and we can also make a call to the hospital number for queries

TECHNOLOGIES

- The technologies we used is
 1. HTML
 2. CSS
 3. BOOTSTRAP, FLEX PROPERTIES
 4. JAVA SCRIPT.

THANK YOU
